BACK END DEVELOPER

Software engineer with **4+ years** of experience building and maintaining back-end systems — from REST APIs and ERP platforms to event-sourced architectures. Worked across freelance and corporate environments delivering production systems for real clients in healthcare, industrial, and commercial domains. Comfortable owning systems end-to-end: from requirements analysis and ERD design to deployment and server maintenance on AWS EC2.

TECHNICAL SKILLS

Languages	: PHP, Typescript, SQL, Javascript, TeX
Frameworks	: Laravel, Node.js
Databases	: PostgreSQL, MySQL, MariaDB, SQLite
Architecture	: REST APIs, Event Sourcing, Vertical Slices, Clean Architecture, HMVC, MVC
Practices	: Functional Programming, OOP, Design Patterns, Vertical Slices, Type-Driven Development, Storybook, CI/CD
DevOps	: AWS EC2, Linux, Apache, Nginx, Docker, Git, Github Actions, SSH, Cron
Others	: ERD Design, SRS Design, User Stories, OAuth, Accessibility (WCAG), SEO

EXPERIENCE

Software Engineer

BytesMaestros

Dec 2025 – Present

Hybrid – Alexandria, Egypt

- Build and maintain back-end services for a product suite including a **business menu system (Menuzi)** and **e-commerce** platform using **TypeScript**, **Node.js** and **PostgreSQL**
- Apply **event sourcing** and **functional programming** patterns (functional core, imperative shell) across production systems
- Collaborate with UI/UX and content teams to own features from requirement to delivery

Software Engineer

Gopuppy

Sep 2024, Jan 2025 – Dec 2025

Fulltime, Contract – Cairo, Egypt

- Developed and maintained back-end ERP system using **Laravel**, **MySQL** and **SCSS**
- Maintained Gopuppy **linux** servers from different providers
- Developed **CI/CD** pipelines for rapid delivery
- Continued engagement via **contract** during military service period
- Developed **multi-lingual** marketing website with integrations with the ERP

Full-Stack Developer

Storiagate

Mar 2024 – Sep 2024

Hybrid – Alexandria, Egypt

- Redesigned internal company system and forms using **PHP** and **JavaScript**
- Built reusable server-side modules and localization utilities mirroring Laravel's interface
- Refactored **legacy codebase** to reduce complexity and improve maintainability
- Maintained production website on a **Linux** server

Back-End Developer

Freelance

Jul 2022 – Present

- Designed and developed **REST APIs** for medium-sized systems including **ERP** platforms and clinic management systems
- Built a resource management ERP for industrial corporates covering supply chain, procurement, HR, and employee check-in — using **Laravel**, **event sourcing**, and **clean architecture**
- ERP systems with OTP-based operations and multi-role authorization
- Diagnosed and resolved bugs in **legacy** PHP and Laravel ERP systems

- Deployed and maintained production websites on **AWS EC2** including domain configuration, **HTTPS**, and periodic **cron-based** backups
- Conducted stakeholder requirements analysis and produced **ERD**, **SRS**, and **user stories**
- Built multi-role authorization systems with **OTP-based** operations across several client projects
- Implemented email-based OTP flows and transactional email/notification systems for production applications
- Developed multilingual back-ends and content systems supporting multiple locales

Vice Head of Web Development Committee
GDSC KSU

Sep 2022 – Apr 2023
Remote – Kafrelsheikh, Kafrelsheikh, Egypt

- Share knowledge and experience with my fellow members
- Demonstrated critical topics in core **Front End** technologies, including **SEO**, and **Accessibility**

EDUCATION

University of Kafrelsheikh – Faculty of Computers and Information
Bachelor of Science in Computer Science
GPA: 3.24/4 (With Honors)

Kafrelsheikh, Kafrelsheikh, Egypt
Sep 2020 – Jun 2024

PROJECTS

Water Treatment Company ERP	<i>Laravel, PostgreSQL, Svelte, Event Sourcing, Clean Architecture</i>	Private
• ERP system for an industrial water treatment corporate managing supply chain, procurement, HR, and technical departments		
Clinic Management System (ERP)	<i>PHP, Vue, MariaDB, Socket.IO, Node.js</i>	Private
• RESTful API-based CRUD system with live queues via Socket.IO, activity logs, authorization rules, payroll, and patient management • Analyzed stakeholders' requirements, designed an ERD based on the analysis		
Salem Clinic Website	<i>PHP, MySQL, Javascript, Git</i>	Private
• Dynamic monolith with admin panel for content and article management • Built a custom Markup-to-HTML rendering library in PHP and JavaScript • Deployed on Apache/EC2 with HTTPS and automated cron backups		
Online Chat	<i>PHP, Laravel, HMVC, SCSS</i>	<u>Demo</u>
• Real-time customer service chat using laravel-websockets and laravel-echo • REST API for mobile app and Blade/JS frontend for customer service		

CERTIFICATIONS

- ITI - Web Development Using PHP (150 hrs.)
